**OASIS Posting May 8, 2015**

As previously announced in a press release dated July 7, 2014, Emera Maine and Central Maine Power (CMP) signed a memorandum of understanding for joint project development to improve links between southern New England and northern Maine. This joint development activity involves electric transmission projects to enhance the strength and capacity of the state's bulk power grid and improve access for new generation resources.

On February 25, 2015, three New England States issued a Draft Request for Proposals for Clean Energy and Transmission. This can be found online at <http://cleanenergyrfp.com/>.

Parties interested in discussing how the Emera Maine/CMP MOU projects may relate to the anticipated Clean Energy and Transmission Request for Proposal should contact the following:

Emera Maine	Central Maine Power
Alan Richardson Vice President, Transmission (207) 973-2816	Thorn Dickinson Vice President, Business Development Iberdrola USA (207) 688-6362
Lisa Martin Manager of Strategy and Development (207) 941-6635
